

§ 180.1215

encoding the Cry3Bb1 protein. This exemption from the requirement of a tolerance will expire on May 1, 2004.

[66 FR 24066, May 11, 2001]

§ 180.1215 *Bacillus thuringiensis* Cry2Ab2 protein and the genetic material necessary for its production in corn or cotton; exemption from the requirement of a tolerance.

Bacillus thuringiensis Cry2Ab2 protein and the genetic material necessary for its production in corn or cotton are exempt from the requirement of a tolerance when used as plant-pesticides in the food and feed commodities of field corn, sweet corn, popcorn, cotton seed, cotton oil, cotton meal, cotton hay, cotton hulls, cotton forage, and cotton gin byproducts. *Genetic material necessary for its production* means the genetic material which comprise genetic material encoding the Cry2Ab2 protein and its regulatory regions. *Regulatory regions* are the genetic material, such as promoters, terminators, and enhancers, that control the expression of the genetic material encoding the Cry2Ab2 protein. This exemption from

40 CFR Ch. I (7–1–01 Edition)

the requirement of a tolerance will expire on May 1, 2004.

[66 FR 24066, May 11, 2001]

§ 180.1217 *Bacillus thuringiensis* Cry1F protein and the genetic material necessary for its production in corn; exemption from the requirement of a tolerance.

Bacillus thuringiensis Cry1F protein and the genetic material necessary for its production in corn are exempt from the requirement of a tolerance when used as plant-pesticides in the food and feed commodities of field corn, sweet corn and popcorn. “Genetic material necessary for its production” means the genetic material which comprise: genetic material encoding the Cry1F protein and its regulatory regions. “Regulatory regions” are the genetic material, such as promoters, terminators, and enhancers, that control the expression of the genetic material encoding the Cry1F protein.
